

REPAIR AND MAINTENANCE

Sustainable by extending life and reducing waste

Our engineers are specialized in repairing and maintaining of floating and non-floating rubber hoses, buoys, fenders, pressure- and suction hoses. Parc applies en repairs wear resist layers in pumps. We also repair and maintain submerged doors in dredgers and conveyor belts. One of our specialties is PE welding in PE floaters, buoys etc. and HDPE pipes butt welding from Ø30 mm up to Ø 250 mm.
